

**George F. Heinrich, M.D. Symposium
Keynote Speaker 2010**

Profile appears as written in the year of publication.

Robert E. Ratner, M.D., F.A.C.P.
**“Diabetes 2010:
From Public Policy to Target Organs”**

Robert E. Ratner, M.D., F.A.C.P. is Senior Research Scientists at the MedStar Health Research Institute, Hyattsville, MD. MedStar is a not-for-profit regional health care system serving the Baltimore-Washington area, with a network of nine hospitals and 20 other health-related businesses.

In addition, Dr. Ratner is Professor of Medicine at Georgetown University School of Medicine, Washington, DC. He has also recently completed a sabbatical as a Robert Wood Johnson Foundation Fellow in Health Policy, having served as the study director for the Comparative Effectiveness Research Priorities Committee of the Institute of Medicine, and a program examiner for health reform in the Health Division of the U.S. Office of Management and Budget.

Dr. Ratner has extensive national-level experience with both the government and the American Diabetes Association. Most recently, he completed six years of service on the Steering Committee of the National Diabetes Education

Program, a partnership of the National Institutes of Health, the Centers for Disease Control and Prevention, and more than 200 public and private organizations.

Dr. Ratner earned his M.D. and served an internal medicine residency at Baylor College of Medicine in Houston. He also served a fellowship in endocrinology and metabolism at Harvard Medical School.

He has received numerous grants and served as principal investigator for numerous national and international studies in diabetes. His research interests include diabetes therapeutics and complications, with an emphasis on translational efforts from controlled trials into community-based practice.

He is an associate editor of the *Journal of Clinical Endocrinology & Metabolism* and the author of more than 110 scientific articles and 20 book chapters.
